The Balochistan province is spread over a huge area but its people are backward from all aspects. This fact on the other hand can also not be denied that train is an important means of traveling from the other provinces of the country. It is unfortunate that despite poor condition of trains Sleeper compartments have been removed from them and now these trains either have AC or Economy Class only. Even the trains running on Balochistan routes don't have water and electricity. For the last past few years railway fares have also been increased manifold which are unaffordable for the people traveling to Punjab, Sindh and NWFP provinces. Moreover, trains from Quetta to other cities including Abaseen Exp, Balochistan Exp and Sindh Exp. have also been brought to a close. This house, therefore calls upon the provincial govt. to contact the federal govt. that besides making a cut in railway fares condition of trains should be improved and trains that have been put on a halt should be restored.
