ANNEXURE I: STATEMENT OF OBJECTIVES AND REASONS.

THE BALOCHISTAN FOREST ACT, 2022

S.No.	OBJECTIVES	REASONS
1	**Meet the present day challenges**	Presently the Forests in Balochistan are being regulated by Forest Act 1927 Balochistan Firewood and Charcoal (Restriction) Act 1890 and Balochistan Forest Regulation 1890. The present laws obviously are outdated and do not meet the present day challenges of the sector. Climate change, Global warming, population growth have become Global challenges. Meeting the National obligations through participatory and sustainable use of resource are the main reasons for proposing Balochistan Forest Act 2022.
2	**Emergence of Global venues for partnership**	Contrary to the era of 1920s, a new global economic and political regime has emerged. The venues of UNESCO, IUCN, WWF, Wetlands and other corporate bodies support environmental activities either as their function or as corporate social responsibilities. Sequestrated Carbon is a new saleable commodity in the market. But for trade of carbon the community rights are a prerequisite of International market. Carbon as commodity and community share proportionate to their conservation effort upto 70% has been proposed to qualify for the emerging venues of fund generation. The new status of "Biosphere reserves, Natural Heritage sites have also been incorporated to make the law compatible with new horizons of Development.
3	**Sustainable Conservation strategy**	The resource without utilization is of no use. That is why sustainable based conservation strategy is adopted in the proposed bill.
4	**Involvement of Local communities in Conservation and Protection activities**	Community empowerment has been put in the centre of responsibility in order to incorporate the modern paradigms of

S.No.	OBJECTIVES	REASONS
		development in the proposed Act 2021. Public -private partnership on conservation of natural resources has been linked through the proposed law to encourage investment in the forestry sector to meet local requirements and global challenges.
5	**Declaring Forest as a Force**	Over the period illegal activities have equipped the undesirable sections of society with arms and other influences, which are impossible to be confronted with an old and obsolete instrument. Scaling up the status of forest machinery into a "Forest Force" with coercive authority and powers of investigation are proposed for protection of public interest in the Forest Act.
6	**Penalties and Punishments**	The penalties and punishments for breach of any prohibited act under the existing Act are very nominal. In order to discourage the commission of forest offences the quantum of penalties and punishments has been enhanced in the proposed bill.
7	**Conferment of Powers to Normal Courts**	The powers of trial of forest offences are proposed to be conferred to Judicial officers in the proposed Act. In the existing system the imposition of fine and compensation is being exercised by officers of forest department. Many a times arbitrary powers drag the public into resentment. This trend is being reversed to make the officers accountable for the legal actions they take in performance of their enhanced duties.
8	**Prevention of encroachments on forest lands**	The reserved forest area has to be 12% of the total land mass of Balochistan. But in effect thousands of acres of forest land has been encroached/grabbed. To cope with the challenge the punishment for encroaching forest land has been proposed to be substantially enhanced. Further to that rent of the land is also being proposed in addition to demolition of such encroachments.
